

## What are the advantages of bathing and drying cats?

- Reduces the buildup of dirt and dead hair on the cat's coat, keeping them cleaner and healthier.
- Helps to prevent flea and tick infestations, as these parasites are more easily detected during bathing.
- Reduces the cat's body odor, leaving them smelling fresher and more pleasant.
- Can help to alleviate itching and irritation on the cat's skin, especially if a specific cat skin care shampoo is used.
- Helps to keep the cat cool during hot summer days.
- Strengthens the bond between owner and cat, as the act of bathing can be a positive and enjoyable experience for both.
- Can be an opportunity to check the cat's overall health, such as the presence of wounds, scratches, lumps, or other abnormalities that may require veterinary attention.
- Drying the cat after bathing can help to prevent colds and other illnesses, as wet cats are more susceptible to getting sick.

It's your cat's time to shine!

## THE IMPORTANCE OF THE CAT BATHING

## Is your cat clean?

“Being clean” means removing the dirt that accumulates daily, that is, all the germs, dead skin and remains of urine and feces. To carry out this deep cleaning, it is necessary to wash the cat with water and shampoo, because it is the only way to remove 100% of the dirt that accumulates there on the cat's skin and fur.

The act of the cat just licking itself is not enough to eliminate all the dirt.

### Facts:

- Fur and skin are not high cleaners.
- Cats are more susceptible to fleas, dandruff, leftover feces and urine and ingrown toenails.
- The cat alone is not able to clean itself 100%.

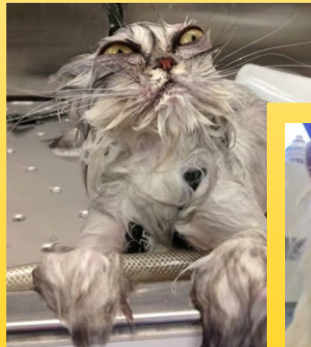

## What does cleaning consist of?

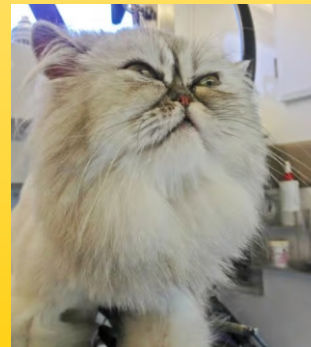

Shampoo until foaming, rinse with warm water and dry the fur so it doesn't make knots. This process greatly reduces hair loss, because during the washing, the dead hair is removed all at once.

## How do you know if your cat needs a bath?

- Is throwing a lot of hairballs.
- Is having a lot of hair loss.
- It is accumulating a lot of dry feces and urine remains.
- Has matted fur and is always full of knots.
- If you want your cat to always keep its coat soft and silky.

Before

After

It is important to emphasize that what is recommended for your cat to always keep clean and with soft fur is bathing every six weeks, which should always be carried out by a certified professional groomer, with the necessary skills to handle the cat correctly.

## What services a skilled cat groomer can do:

- Soft paws nail caps
- De-shedding treatment
- Sanitary trim
- Belly shave
- Shaving or trimming the coat to be shorter
- Treatment of tear staining, chin acne, and stud tail
- Regular inspection of the cat's entire body to allow for early treatment should a health concern arise
